Built-in Battery Charger

Wireless Minitar Pocket Router

Model No: **MN328**

Overview:

The Pocket Router from Minitar is a handy all-in-one portable router, perfect for regular travellers and people on the go. Simply plug the network cable into an Ethernet port (offered by many hotels) and enjoy wireless Internet coverage in your room for all Wi-Fi devices and smartphones, without having to use a power point as the Pocket Router is battery powered. The Pocket Router also comes with a 4200 mAh battery that can be used to recharge your iPod, iPhone, and iPad with a USB charger cable and can also support a Micro SD card for storage, so you can safely store data wherever you go.

Description:

The Pocket Router by Minitar is a handy all-in-one portable router, perfect for regular travellers and people on the go. Simply plug the network cable into an Ethernet port (offered by many hotels) and enjoy wireless Internet coverage in your room for all Wi-Fi devices and smartphones, without having to use a power point as the Pocket Router is battery powered. The Pocket Router comes with a 4200 mAh battery that can be used to recharge your smartphones and tablets with a USB charger cable and can also support a Micro SD card for storage, so you can safely store data wherever you go. Extend your wireless Internet range at home by using the Pocket Router as a repeater to add on to your current wireless range.

This compact router easily fits into a shirt pocket, briefcase or laptop bag making it the ultimate portable device. The Pocket Router is a simple plug and play device that won't need configuring and is a 802.11n wireless standard that has a 150 Mbps connection speed. The hard case cover provides quality anti-scratch protection for the router. The Pocket Router is compatible with Microsoft Windows, Mac OS, NetWare, UNIX and Linux and also supports various 3G dongles.
